

INSTRUCTOR TRAINING CENTRE
OF
THE INDUSTRIAL TRAINING FUND
Established in 1983

Administration Block of the Centre

Chalawa Road, PMB 3222, Kano Nigeria

THE INSTRUCTOR TRAINING CENTRE, KANO

1.0 INTRODUCTION

The Instructor Training Centre, ITC, Kano was established by the Industrial Training Fund in 1983 as a strategy of achieving the mandate of the fund in the area of Instructors/Skills development.

It is located in Darayi Quarters, close to Bayero University Old Campus, Challawa Road, Kano, Nigeria.

2.0 FACULTY

The Centre has a faculty of specialists in the following fields: -

- Mechanical Engineering
- Auto motive Engineering
- Electrical Engineering
- Electronic Engineering
- Agric Mechanization
- Metal Fabrication
- Pedagogy
- Management

3.0 COURSES AVAILABLE AT THE CENTRE

To date the centre has developed, pilot tested, and run a number of times, thirty-five different courses in different skills areas with over 5,000 Nigerians benefiting.

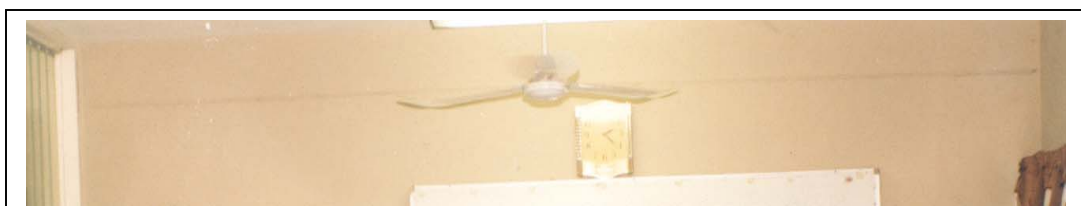

The programmes available at the centre are mainly in three categories, viz;-

- Instructional Skills Courses
- Supervisory Skills Courses
- Vocational Skills Courses

3.1 INSTRUCTIONAL SKILLS COURSES

Courses and workshops under this heading include:-

- Instructional Skill Development Course
- Supervisory and Instructional Skills Course
- Training coordinators workshop
- On-the-job training techniques workshop

Training session on Instructional Skill Development.

3.2 SUPERVISORY SKILLS COURSES

Courses under this heading are:-

- Operators Performance Improvement Course
- Maintenance supervisor Course.
- Supervisory Management course

3.3 VOCATIONAL SKILLS COURSES

Courses under this heading are: -

- Light vehicle fault tracing and maintenance course
- Electrical/Electronics equipment Maintenance Course
- Metal Machining Skills Course
- Agric Machinery and Equipment Maintenance Course.
- Machinery and Equipment Maintenance Course
- Heavy duty Vehicle Maintenance Course.
- Conventional and Electronics Ignition Maintenance Course.

Training session on Automotive Engineering.

4.0 FACILITIES

The centre has ample facilities to cater for different courses and workshops outlined above. These include audio visual laboratories, technical workshops and demonstration laboratories, in all the specialist skill areas.

Training Halls and rooms for conferences and seminars with varying seating capacity of 30, 60, and 150 participants are available.

Hence the centre has provision to run a number of different programmes at the same times.

As part of ITF services to Industry and Commerce towards training and development these facilities are rented out to consultants to use at subsidized rate.

One of the ITC, Audio Visual Laboratories.

5.0 EQUIPMENT AND TOOLS

Equipment and tools similar to what is obtainable in industry are available in each of the vocational areas. This offers participants standard training to enable them fit in real life working condition on completion of programme.

Demonstration Session in Mechanical Workshop

6.0 PROGRAMME DURATION

Basically all courses are of one-week duration. However, there is flexibility, which allows some programmes to take two weeks or more, depending on course content, methodology of implementation, entry behaviour of participants, and other factors.

The flexibility is permitted to meet the needs of industry for which the centre, indeed the ITF was established.

7.0 TAILOR MADE COURSES

The centre has scheduled courses on yearly basis. However, there is provision for courses obtainable in the centre to be tailored to the needs of beneficiary organisation in terms of content, venue, implementation strategy, etc.

Interested companies and organizations are therefore encouraged to avail themselves of this provision by contacting the centre. See inquiries.
